

# NIHOT SDS GLASS CLEAN UP

Vision  
Innovation  
Collaboration

## BENEFITS

The Nihot Drum Separator (SDS) Glass Clean Up is a semi-mobile air separator in a plug & play version with integrated dust filter, electrical cabinet and fitted with retractable outriggers. High capacity with precise separation, this unit removes more than 99% of light material, such as shredded paper, from glass and other heavies.

Fast return on investment, low operating costs and superior reliability

Plug and Play

Closed loop, low dust

Mechanically and electronically tuneable

Precise density separation

# NIHOT SDS GLASS CLEAN UP

Removes more than 99% of light material, such as shredded paper, from glass and other heavies.

*What's next.*

Glass and other heavies

Mixed fiber and lights

Nihot SDS Glass Clean up

## APPLICATIONS

- Single Stream
- Municipal Solid Waste

## FEATURES

- High capacity: 8-10 tph
- One-piece, Plug-and-Play unit
- Compact footprint
- Fits into a semi trailer or 40' container
- Simple retrofit in existing facilities
- Low maintenance and very few wear parts, meaning more uptime and low operational costs
- Integrated dust collection (low dust emissions)
